

# The Marlene Meyerson Jewish Community Center

**A place in the community to strengthen physically, intellectually, and spiritually**  
*Creating Opportunities For People To Connect, Grow, And Learn*

**This project successfully addressed the complex criteria of creating technologically functional spaces that can be used as one large room or three closed off sections**

**The oval-shaped meditation space employs overhead and cove accent lighting as well as enhanced controls to give the occupants optimal lighting and thermal comfort**

**Motorized shades were incorporated into the design to allow for near instant mitigation of the sun for movies and presentations**

**Spaces are outfitted with wall mounted TVs and high-powered projectors, so an optimal viewing experience is provided for movies, presentations, and classes in this space.**

**The AV system has partition sensors for the operable walls that can detect when the room is fully open or partitioned off enabling the AV controls to adjust automatically.**

**The Marlene Meyerson  
Jewish Community Center  
Manhattan, NY**

**Kahn Architecture &  
Design, PC**

 **CAMERON  
ENGINEERING**  
New York, NY
